

# **Avian Control**<sup>®</sup>

## **Bird Repellent**

### **Agricultural Spraying Instructions**

#### **Backpack or Electric Sprayer**

1/8 acre (5445 sq. ft.)	Mix 3–4 ounces of Avian Control <sup>®</sup> with 1-1.5 ounces of liquid dishwashing detergent (Dove, Palmolive or similar) and add to one to two gallons of water.
1/4 acre (10890 sq. ft.)	Mix 6–8 ounces of Avian Control <sup>®</sup> with 2-3 ounces of liquid dishwashing detergent (Dove, Palmolive or similar) and add to two to four gallons of water.
1/2 acre (21780 sq. ft.)	Mix 12–16 ounces of Avian Control <sup>®</sup> with 4-6 ounces of liquid dishwashing detergent (Dove, Palmolive or similar) and add to four to eight gallons of water.
1 acre (43560 sq. ft.)	Mix 24–32 ounces of Avian Control <sup>®</sup> with 8-12 ounces of liquid dishwashing detergent (Dove, Palmolive or similar) and add to eight to sixteen gallons of water.

#### **Air Blast or Boom Sprayers**

Apply per label instructions using 24 to 32 ounces of Avian Control<sup>®</sup> per acre with 25 to 100 gallons of water.

#### **Tank Mixing**

Avian Control<sup>®</sup> Bird Repellent may be mixed with other agricultural chemicals. Prior to mixing, blend a small amount of Avian Control<sup>®</sup> with the other chemical in a jar of water to determine if they are compatible.

DO NOT mix Avian Control<sup>®</sup> with chemicals that have a pH below 7.0, as this may reduce the effectiveness of Avian Control<sup>®</sup>.
