

InvisiDye™

UV MARKER

PRODUCT INFORMATION

What is InvisiDye™ UV Marker?

InvisiDye™ UV Marker is a non-lethal UV (ultra violet) marker training tool, that when teamed with Avian Migrate® Goose and Bird Repellent, teaches geese and birds to avoid treated grass, plants and landscaping.

How does InvisiDye™ UV Marker work?

By visually training birds to associate irritation with an area treated with a UV marker. Geese and other birds can see UV light waves (200-400nm) which allows them to see a portion of the light spectrum that is invisible to the human eye.

FEATURES & BENEFITS

- Can be seen by geese and birds which have a visual range between 200-400nm
- Works by giving geese a visual warning to avoid treated areas
- Apply in combination with Avian Migrate® Goose and Bird Repellent

Who uses InvisiDye™ UV Marker?

- Golf Courses
- Home Owners
- Lawn Care Companies
- Horticulturalists
- Property Management Firms
- Schools and Universities
- Parks and Recreation
- Sports Fields
- Office Campuses

Anyone who has a persistent bird problem such as geese or other birds that repeatedly feed or roost in the same areas.

When do you apply InvisiDye™ UV Marker?

You should apply InvisiDye™ UV Marker in combination with Avian Migrate® Goose and Bird Repellent. This allows the geese and birds to immediately associate the repellent effects of the product with the color.

What rate do I apply InvisiDye™ UV Marker?

Mix 1/2 oz of InvisiDye™ UV Marker and 6.5 oz of Avian Migrate® per gallon of water to make the application solution. Treat areas where birds feed, roost or congregate according to Avian Migrate® Goose and Bird Repellent label instructions.

InvisiDye™ UV Marker Concentrate

Item#	Description	Price
